Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 25-27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which

Art Unit: 3636

applicant regards as the invention. In claim 25, the recitation "extends upwardly either side" is grammatically vague. Claims 26 and 27 are indefinite since each depends from an indefinite claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15, 20, 21 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Rosko (6089666). Note the elongate member (18, 24), rear-leg support (26), seat (76), back-rest (75), front leg-support (24), collapsed condition (folding of rear legs about pivots 27), and foot projections (42, 43).

Claims 15 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Cheng (6481790). Note the elongate member (in Figure 2, note the seat, backrest and front leg support), rear-leg support (see Figure 2), and foot projections (see Figure 2).

Claim 15 is rejected under 35 U.S.C. 102(b) as being anticipated by Chien (5468043). Note the elongate member (10, 11, 20), rear-leg support (21), seat (20), back-rest (10), and front leg-support (11).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 16 rejected under 35 U.S.C. 103(a) as being unpatentable over Cheng (6481790) in view of Guichon (5044691). The primary reference shows all claimed features of the instant invention with the exception of the elongate member being a one-piece molding. Note the discussion of Cheng, above. The secondary reference teaches configuring the elongate member (backrest, seat and front leg support) of a chair as a one-piece molding. Note the abstract, and see Figure 1. It would have been obvious to one having ordinary skill in the pertinent art at the time of the instant invention to modify the primary reference in view of the teachings of the secondary reference by forming the elongate member as a one-piece molding. This provides a conventional formation for a seating assembly and eliminates any need to fasten separate parts together in order to form the assembly.

Allowable Subject Matter

Claims 25-27 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claims 17-19 and 22-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
